

ANIMA BIOTECH TO PARTICIPATE IN FIRESIDE CHAT DURING THE UNDRUGGABLE LEADERS FORUM

BERNARDSVILLE, New Jersey, September 14, 2021 – Anima Biotech, the leader in the discovery of selective small molecule mRNA drugs and their mechanisms of action, today announced that the company will be participating in a fireside chat during the Undruggable Leaders Forum taking place on September 15, 2021.

During the conference, Yochi Slonim, Co-Founder and Chief Executive Officer of Anima Biotech, will participate in a fireside chat alongside Beth Shafer, Head of Neuroscience, Drug Discovery Sciences and Externalization Business Development at Takeda. This session will explore the Anima-Takeda collaboration for the discovery and development of mRNA translation modulators for Neurological diseases. The fireside chat will be held on Wednesday, September 15, at 12:00 p.m. ET.

About Anima Biotech

Anima Biotech is advancing mRNA Lightning, a novel platform for the discovery of selective small molecule mRNA drugs and their mechanisms of action. Our differentiated approach combines high scale automated phenotypic screening in live biology with AI mRNA image analysis. The high scale automation and integrated technologies in our platform enabled us to develop a broad pipeline across 18 different discovery programs in various therapeutic areas. With our tremendous expertise in mRNA biology, we were able to advance them at unprecedented speed and success rate. Our wholly owned pipeline programs are in Fibrosis (tissue selective Collagen I translation inhibitors across several fibrotic diseases), Oncology (c-Myc and K-Ras translation inhibitors with multiple, tumor specific mechanisms of action), Infectious diseases (RSV viral proteins translation inhibitors) and Neuroscience (Alzheimer's disease – Tau translation inhibitors and Pain - Nav1.7 translation inhibitors) with additional programs in Repeat Associated Diseases. In addition to our own pipeline, we have established strategic collaborations with Pharma in partnered programs including our large scale collaborations with Lilly and Takeda Pharmaceuticals. Our science was further validated with seven patents, 15 peer reviewed publications and 17 scientific collaborations. To learn more about us, visit <https://www.animabiotech.com>
